Fifteen Months of Fudge in Review

Milestone 3
Overview and History

- ACM Practice Squad
- What are TJU and UVA
- Problem archive, simple interface
- Lacked something
• User centric
• Socialization, community, communication
• Dynamic, responsive interface
• Academic in nature
• Use of new technologies
• Version control, team management
• Web 2.0 features
• Windows based solution
• Going gold early 2008
• User growth, excited and overwhelmed
• Hundreds of users, beyond local scope
• Impressive activity
- Meeting place for students, professors, employers
- Provide a wide range of services
- Be a catalyst for discussion of computer science related topics
• Realistic development projects
• Has same needs: team and time management
• Good design and requirements are fundamental
• People need to have a stake in the project
• Re-engineered Fudge will go live December 15

• Necessary to find interested juniors and seniors

• Great potential for developing new features
